IDEAL PUMP UNION DISCONNECTS

MAXIMUM SERVICE SPECIFICATIONS 80°C/176°F @ 3.5 BAR/50PSI

- Designed to install into pump volute and suction connection to prevent the failure of high temperature build up in pump volutes when dry running pumps build up severe heat.
- Eliminates stressing outer thread of mating parts due to overtightening and possible consequent cracking.
- Eliminates the requirement of thread sealants while providing a reliable seal seal on the O-ring surface (high temp. EPDM).
- Provides easy installation while supplying a union connection for future servicing needs.
